

Pressure map performed with Force Sensitive Applications (FSA) seat system equipment on July 21, 2004. Client is a female T4 incomplete spinal cord injury with Brown-Sequard Syndrome since 1987. Height of client: 5' 4" (162 cm), weight: 120 lbs (54.5 kg). Assessment performed by Trudie Read OTR/L.

The pressure map demonstrates the following benefits of the ProForm NX:

- Peak pressure areas reduced to 64 mmHg
- Average pressure reduced to 12.5 mmHg

Pressure map of client in previous seating system by Silhouette:
